SUMMARY

Analytical startup operator with experience across growth, monetisation, product strategy, and data-driven experimentation in fast-paced startup environments. Currently working in the Founder's Office at LH2 Holdings, driving revenue growth and performance optimisation across U.S.-based digital publishing assets through audience analytics, AdOps coordination, SEO strategy, and cross-functional execution. Strong background in solving ambiguous 0→1 business problems using structured analysis, user behaviour insights, and operational ownership.

EXPERIENCE

Founder's Office

July 2025 – Present

LH2 Holdings — Bangalore, India

- Driving growth and monetisation strategy across multiple U.S.-based publishing assets, collaborating with AdOps, SEO, content, and tech teams.
- Managed full-funnel performance tracking across traffic, engagement, and revenue metrics to identify optimisation opportunities.
- Built newsletter monetisation workflows from scratch for publishing assets with 1M+ monthly sessions through media partnerships and content syndication integrations.
- Scaled one publication to 20K newsletter subscribers within 3 months, contributing to the first \$1K in newsletter revenue within 5-6 months; model later expanded across 5+ media assets.
- Currently working on subscription-led monetisation models and audience retention strategies across publishing properties.
- Built user tracking and ID frameworks to unify engagement and monetisation signals across platforms, improving audience segmentation and analytics visibility.
- Coordinated cross-functional execution between product, analytics, content, and operations teams to improve business performance.
- Served as SPOC for publishing partners, managing onboarding, monthly reviews, and strategic growth planning.
- Tools: GA4, GSC, SQL, Google Sheets, Excel, Python, AdOps Platforms, Jira, WordPress

Data Analyst – Founding Member

July 2024 – April 2025

Opinium.ai — Delhi, India

- Worked directly with founders on product strategy, customer discovery, and data-driven business problem solving during early-stage product development.
- Built and scaled the data science function from the ground up, establishing workflows for ingestion, analysis, modelling, and deployment.
- Developed NLP and LLM-based pipelines to analyse social media engagement, sentiment, and behavioural patterns at scale.
- Designed graph-based user interaction models using Neo4j to identify relationship and engagement trends across user networks.
- Collaborated across product and engineering teams to translate analytical insights into product features and business decisions.
- Tools: Python, SQL, PostgreSQL, Neo4j, NLP, LLMs, LangChain, Elasticsearch

Startup Analyst

Aug 2023 – June 2024

PedalStart — Gurugram, India

- Led startup evaluation and onboarding workflows, assessing 500+ startups across product, market, and business potential.
- Worked closely with founders on GTM strategy, growth positioning, and investor readiness.
- Managed operations and engagement for a 200+ founder community through structured programming and networking initiatives.
- Coordinated startup ecosystem events across Bangalore and NCR, enabling founder and investor networking opportunities.
- Tools: Excel, Google Sheets, PowerPoint, Python

Business Associate – Investor Relations

Apr 2023 – July 2023

Cyntra — Noida, India

- Conducted market and investor research to identify strategic fundraising opportunities and industry trends.
- Built investor materials, business presentations, and financial models for fundraising discussions.
- Supported partnership outreach and ecosystem networking initiatives for business development.
